Professional Summary

I am an Information Systems graduate from the University of Pittsburgh with hands-on experience in web development, UI/UX design, data analysis, project management, and AI-assisted development. Comfortable working independently, learning quickly, and delivering results using modern tools and platforms.

Education

University of Pittsburgh

B.S. in Information Systems – Major: Cybersecurity (Major GPA: 3.48) | Minor: Criminal Justice (Minor GPA: 3.85) | Expected Graduation: May 2026

Certifications & Achievements

- TryHackMe (In Progress)
- OSHA Certified
- IC3 GS6 Level 1 Certified
- Google Digital Certificate
- Dean's List (4 Semesters)

Technical Skills

- Web & Design: HTML, CSS, UXPin, VS Code, Wireframing & Mockups
- AI & Tools: Claude AI, ChatGPT, Replit AI, Loveable AI, Prompt Engineering
- Data & Analytics: Excel, Tableau, SQL, Python, Google Analytics
- Project Management: Agile/Scrum, Azure DevOps, Product Roadmapping, Miro
- Cloud: AWS (IAM, EC2, VPC), Azure (AD, VM, DNS), Microsoft 365
- Security: Windows OS Hardening, Firewall Configuration, Log Analysis, IAM/RBAC, Network Security

Hands-On Technical Projects/Experience

Web Development & UI/UX Design

- Built a structured website using HTML and CSS with a focus on layout, design, and usability
- Tools: HTML, CSS, Visual Studio Code, Photoshop

UXPin UI/UX Prototypes

- Designed two app prototypes applying wireframing, user flow, and user-centered design principles
- Tools: UXPin

Agile Final Project — Rizzos (AI-Assisted)

- Delivered a full project using Agile methodology and AI-assisted development tools
- Managed sprints, backlog, and product delivery using Azure DevOps
- Tools: Claude AI, Replit AI, Azure DevOps

PERT Estimation & Sprint Practice

- Estimated 9 development epics using PERT; ran a full Scrum sprint with planning, standups, and live deployment
- Tools: Azure DevOps, Microsoft Excel, Wix

Data Analysis — Excel, Tableau & SQL

- Analyzed payroll, sales, and public datasets; built pivot tables, dashboards, and answered business questions
- Tools: Microsoft Excel, Tableau, SQL

Millrats Ticketing System — Product Roadmap

- Designed a full product roadmap across 4 platforms and 4 phased releases for a real sports organization
- Tools: Miro, Azure DevOps

Network Security & Analysis Lab

- Conducted network reconnaissance using Nmap, Command Prompt, and subnetting to identify open ports and assess attack surfaces, with analysis in WifilnfoView App.

PGP Encryption & Secure Communication

- Applied public-key cryptography using GPG/PGP tools to generate keys, encrypt data, and verify message integrity
- Implemented secure communication workflows using PGP tools to protect data confidentiality

Microsoft 365 Configuration

- Set up and managed Microsoft 365 accounts, applications, and collaboration tools including email, Active Directory, and security settings
- Tools: Microsoft 365, Admin Center, Active Directory

Coursework

- Web Development | UI/UX Design | Project Management
- Business Intelligence | Data Analysis | Machine Learning
- Cloud Security | Network Security | Software Security
- System Administration | Digital Forensics | Operating Systems
